ELMOSOFT è una pelle semi-anilina, morbida e flessibile. La sua morbidezza associata alla sua robustezza e ad una vasta gamma di colori disponibili rendono la pelle Elmosoft adatta ad un utilizzo nel contract. Punture di insetti e cicatrici visibili contribuiscono a valorizzare le caratteristiche di unicità ed eleganza di questa pelle.

ELMOSOFT is a soft and pliable Semi-Aniline leather. Outstanding comfort combined with excellent durability and an extensive shade card, makes it very suitable for the public environment. Visible insect-bites and scars from healed wounds add to the elegant quality of the leather.

ELMOSOFT. Weiches, geschmeidiges Semi-Anilinder, Ein sehr strapazierfähiges und im Griff komfortables Leder in reicher Farbauswahl, hervorragend geeignet für Objektausstattungen. Sichtbar erhaltene Insektenstiche und kleine vernarbte Wunden betonen die naturechte Eleganz.

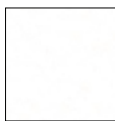

Elmosoft est un cuir semi-aniline, souple et doux. Son confort élevé, associé à une grande robustesse et à une vaste gamme de coloris disponibles, le rend particulièrement indiqué pour les collectivités. Les piqures d'insectes et les cicatrices visibles contribuent à rehausser le caractère élégant du cuir.

ELMOSOFT es una suave y flexible piel semianilina. Su destacable confort combinado con excelente durabilidad y una amplia carta de colores, la hacen muy adecuada para ambientes públicos. Picaduras de insectos visibles y cicatrices de heridas muestran la elegante calidad de la piel.

ELMOSOFT は、柔かくフレキシブルなセミアニリンレザーです。柔らかいうえに頭丈でカラー展開も豊かなため、コントラストに適しています。レザーにみられる虫刺されの痕や傷痕は、世界に二つと同じものがない天然素材としての価値を裏付けるものであり、エレガントな特性を際立たせます。

Consigli per la manutenzione

Piani tavolo e pannelli/scocche delle sedie in legno, polipropilene, polietilene e poliuretano

Pulire con un panno o una spugna morbidi inumiditi con acqua tiepida. È consentito l'uso di detergenti neutri diluiti in acqua tiepida. Sono assolutamente da evitare detergenti aggressivi, contenenti candeggina o ad azione abrasiva (come le creme per sanitari).

Piani in laminato

Possono essere puliti con prodotti energici, come i normali detergenti per superfici domestiche, diluiti in acqua tiepida, purché non siano né abrasivi, né contenenti acidi o candeggina. Evitare spugne o pagliette in fibra sintetica o metallo che rigano irrimediabilmente le superfici.

Superfici cromate, anodizzate o verniciate

Possono essere pulite con prodotti energici, come i normali detergenti per superfici domestiche diluiti in acqua tiepida, purché non siano né abrasivi, né contenenti acidi o candeggina. Evitare spugne o pagliette in fibra sintetica o metallo che rigano irrimediabilmente le superfici. In ogni caso i prodotti devono essere accuratamente risciacquati per evitare che tracce di detergente aggrediscano la finitura speciale, provocando fenomeni di opacizzazione o di ossidazione. Dopo il lavaggio asciugare con un panno scamosciato. I prodotti lucidanti (polish) per cromature o vernici sono sconsigliati: vanno utilizzati con cautela e solo da personale esperto, in quanto l'azione abrasiva può danneggiare irrimediabilmente le superfici.

Tessuti

Possono essere trattati con spazzole inumidite, eventualmente impiegando detergenti delicati o aceto, entrambi molto diluiti oppure a secco con appositi prodotti. Per una manutenzione ottimale si raccomanda di fare riferimento alle indicazioni fornite dai simboli ENI-EN-ISO 3758 riportati sulle specifiche schede tessuto.

Cuoio, Pelle, Cuoietto

Non pulire con acqua, che lascia aloni. Utilizzare piuttosto prodotti di qualità per la pulizia della pelle seguendo attentamente le indicazioni del fabbricante del prodotto di pulizia. Nei casi dubbi testare il prodotto su una parte nascosta alla vista per verificarne il risultato, attendendo almeno 24 ore per l'eventuale insorgenza di problemi.

Acciaio inox

Pulire periodicamente (ogni 15-20 giorni) con un panno morbido inumidito o con prodotti specifici per acciaio inox reperibili in commercio.

Ecopelle

Può essere trattata con un panno inumidito con acqua tiepida.

Maintenance advice

Table-tops and seat panels/shells made of wood, polypropylene, polyethylene or polyurethane

May be cleaned with a damp, soft cloth or sponge using lukewarm water. Neutral diluted detergent may also be used in lukewarm water. Strong detergents which contain bleach or which have an abrasive effect (such as scouring creams) should be avoided at all costs.

Laminate surfaces

May be cleaned with strong products such as normal detergents for domestic surfaces diluted in lukewarm water, provided that they are not abrasive and do not contain acids or bleach. Avoid sponges and scourers made from synthetic fibres or metal which may leave permanent scratches on the surfaces.

Chrome, anodised or lacquered surfaces

May be cleaned with strong products such as normal detergents for domestic surfaces diluted in lukewarm water, provided that they are not abrasive and do not contain acids or bleach. Avoid sponges and scourers made from synthetic fibres or metal which may leave permanent scratches on the surfaces. The products must be properly rinsed so that traces of the detergents do not spoil the special finish by causing the surface to turn opaque or to oxidise. After washing, dry it with a chamois leather. Polishes for chromed or lacquered finishes are not recommended: they should be used with caution and only by experts since the abrasive action may irreparably damage the surfaces.

Fabric

May be treated using damp brushes, possibly with light detergent or vinegar, both of which should be very dilute. Alternatively, it can be drycleaned using appropriate products. For best care and maintenance results please follow the indications given by the ENI-EN-ISO 3758 symbols on the relevant fabric information sheet.

Hard leather grade 1, hard leather grade 2 and soft leather

Must not be cleaned with water as this may leave marks. It is better to use quality products for cleaning leather, carefully following the instructions of the manufacturer of the cleaning product. In case of doubt test the product on a small area which is normally hidden from view in order to check the result, waiting at least 24 hours to allow any possible problems to develop.

Stainless steel

Clean regularly (every 15 to 20 days) with a soft damp cloth or with special products for cleaning stainless steel available on the market.

Faux leather

May be cleaned with a damp, soft cloth using lukewarm water.

Empfohlene Pflege

Tischplatten und Sitze/Schalen aus Holz, Polypropylen, Polyäthylen und Polyurethan

Können mit einem feuchten, weichen Tuch oder Schwamm und lauwarmem Wasser gesäubert werden. Es kann auch ein, in lauwarmem Wasser verdünntes, neutrales Reinigungsmittel benutzt werden. Starke Reinigungsmittel, die Bleiche enthalten oder eine Schleifwirkung haben (wie Scheuercreme), sind auf jeden Fall zu vermeiden.

Laminierte Oberflächen

Können mit starken Produkten, wie normalen Reinigungsmitteln für Haushaltszwecke, verdünnt in lauwarmem Wasser, gesäubert werden, vorausgesetzt, sie scheuern nicht und enthalten keine Säure und kein Bleichmittel. Schwämme und Topfkratzer aus Synthetikfaser oder Metall, die die Oberfläche auf Dauer verkratzen könnten, sind zu vermeiden.

Chrom, eloxierte oder lackierte Oberflächen

Können mit starken Produkten wie normalen Reinigungsmitteln für Haushaltszwecke, verdünnt in lauwarmem Wasser, gesäubert werden, vorausgesetzt, sie scheuern nicht und enthalten keine Säure oder Bleiche. Schwämme und Topfkratzer aus Synthetikfaser oder Metall, die die Oberfläche auf Dauer verkratzen könnten, sind zu vermeiden. Die Produkte müssen gründlich nachgespült werden, um zu verhindern, dass die Oberfläche durch Reinigungsmittelreste opak wird oder oxidiert und somit die besondere Endverarbeitung der Oberfläche beschädigt. Nach dem Waschen mit einem Fensterleder trocknen. Chrom- oder Lackpolituren werden nicht empfohlen; sie sollten nur mit großer Vorsicht von Fachleuten benutzt werden, da ihre Schleifwirkung die Oberfläche auf Dauer irreparabel beschädigen könnte.

Textilien

Können mit einer feuchten Bürste, ggf. mit einem leichten Reinigungsmittel oder Essig, beides stark verdünnt, behandelt werden. Alternativ kann ein entsprechendes Trockenreinigungsmittel verwendet werden. Für eine optimale Pflege die Hinweise der ENI-EN-ISO 3758 Symbole beachten, die auf den speziellen Stoffkarten abgebildet sind.

Kernleder, Weichleder und Leder zweiter Qualität

Sollten nicht mit Wasser gereinigt werden, das Flecken hinterlassen könnte. Es ist besser, Qualitätsprodukte zum Reinigen von Leder zu benutzen und die Anleitung des Herstellers des Reinigungsmittels sorgfältig zu befolgen. Im Zweifelsfall das Produkt auf einer kleinen, normalerweise nicht sichtbaren Fläche ausprobieren und mindestens 24 Stunden warten, um zu sehen, ob sich mögliche Probleme eingestellt haben.

Edelstahl

Regelmäßig (alle 15 bis 20 Tage) mit einem feuchten, weichen Tuch oder mit einem im Handel erhältlichen Spezialprodukt für Edelstahl reinigen.

Kunstleder

Kann mit einem feuchten Tuch und lauwarmem Wasser gereinigt werden.

Conseils d'entretien

Dessus de table et panneaux de siège/coques en bois, polypropylène, polyéthylène ou polyuréthane

Peuvent se nettoyer à l'aide d'un tissu ou d'une éponge doux et humides à l'eau tiède. On peut aussi utiliser un détergent neutre dilué dans de l'eau tiède. Il faut à tout prix éviter les détergents à action forte contenant du chlore ou ayant un effet abrasif (tels que crèmes à récurer).

Surfaces en laminé

Peuvent se nettoyer en utilisant des produits à forte action tels que détergents normaux pour surfaces domestiques dilués dans de l'eau tiède, sous réserve qu'ils ne soient pas abrasifs et qu'ils ne contiennent ni acides et ni chlore. Evitez d'utiliser des éponges et tampons à récurer fabriqués en fibres synthétiques ou en métal qui risqueront de laisser des rayures permanentes sur ces surfaces.

Surfaces chromées, anodisées ou laquées

Peuvent se nettoyer en utilisant des produits à forte action tels que détergents normaux pour surfaces domestiques dilués dans de l'eau tiède, sous réserve qu'ils ne soient pas abrasifs et qu'ils ne contiennent ni acides et ni chlore. Evitez d'utiliser des éponges et tampons à récurer fabriqués en fibres synthétiques ou en métal qui risqueront de laisser des rayures permanentes sur ces surfaces. Veuillez bien rincer pour enlever le produit afin que des traces de détergents ne viennent pas abîmer la finition spéciale en rendant la surface opaque ou en l'oxydant. Après avoir lavé la surface, séchez-la à l'aide d'une peau de chamois. Les cires pour finitions chromées ou laquées sont déconseillées : à utiliser avec prudence et seulement par des experts car leur action abrasive pourrait endommager les surfaces de manière irréversible.

Textiles

Peuvent être traités en utilisant une brosse humide, avec un léger détergent ou du vinaigre, qui doivent tous deux être très dilués. Alternativement, peut être nettoyé à sec avec des produits appropriés. Pour un entretien optimal, prière de se référer aux indications fournies par les symboles ENI-EN-ISO 3758 reportés dans les fiches tissus spécifiques.

Cuir première qualité et cuir deuxième qualité

Ne doit pas être nettoyé à l'eau qui risquera de laisser des marques. Il vaut mieux utiliser des produits de qualité pour nettoyer le cuir, en suivant attentivement les instructions du fabricant du produit de nettoyage. En cas de doute, faites un essai sur une petite surface normalement dérobée à la vue pour contrôler le résultat. Attendez au moins 24 heures pour laisser le temps à tout problème de se développer.

Acier inoxydable

Nettoyez régulièrement (tous les 15 à 20 jours) à l'aide d'un tissu doux et humide ou avec des produits spéciaux pour nettoyer l'acier inoxydable en vente sur le marché.

Simili cuir

Peut être traité avec un tissu humide à l'eau tiède.

Consejos para el mantenimiento

Tableros de mesa y paneles de asiento/carcasas hechos de madera, polipropileno, polietileno y poliuretano

Puede limpiarse con un paño o esponja suaves húmedecidos en agua tibia. También se puede utilizar un detergente neutro con agua tibia. Se debe evitar a toda costa los detergentes fuertes que contengan lejía o tengan un efecto abrasivo (tales como cremas desgrasadas).

Superficies laminadas

Pueden limpiarse con productos fuertes tales como detergentes normales para superficies domésticas diluidos en agua tibia, siempre y cuando éstos no sean abrasivos y no contengan ni ácidos ni lejía. Evite el uso de esponjas y estropajos hechos de fibra sintética o de metal que pueden dejar arañazos permanentes en las superficies.

Superficies de cromo, anodizadas o lacadas

Pueden limpiarse con productos fuertes tales como detergentes normales para superficies domésticas diluidos en agua tibia, siempre y cuando éstos no sean abrasivos y no contengan ni ácidos ni lejía. Evite el uso de esponjas y estropajos hechos de fibra sintética o metal que pueden dejar arañazos permanentes en las superficies. Los productos deben enjuagarse adecuadamente para que los restos de detergente no estropeen el acabado especial, haciendo que la superficie se torne opaca o se oxide.

Después del lavado, séquela con una gamuza. Se recomienda no utilizar abrillantadores en los acabados cromados o lacados: han de utilizarse con precaución y sólo por expertos ya que la acción abrasiva puede dañar las superficies de forma irreparable.

Textiles

Pueden tratarse utilizando cepillos húmedos, preferentemente con detergentes suaves o vinagre, ambos muy diluidos. Alternativamente, puede ser limpiado en seco usando productos apropiados. Para un mantenimiento óptimo se recomienda remitirse a las indicaciones proporcionadas por los símbolos ENI-EN-ISO 3758 indicados en las fichas específicas del tejido.

Cuero, Piel y Cuero segunda calidad

No debe lavarse con agua, ya que puede dejar marcas. Lo mejor es utilizar productos de calidad para la limpieza de la piel, siguiendo atentamente las instrucciones del Tejidoante del producto de limpieza. En caso de duda, pruebe el producto en una pequeña zona que no se vea, con el fin de revisar el resultado, esperando al menos 24 horas para ver si surge algún problema.

Acero inoxidable

Limpiar con regularidad (cada 15 o 20 días) con un paño suave y húmedo o con cualquiera de los productos especiales para la limpieza de acero inoxidable disponibles en el mercado.

Ecopiel

Puede limpiarse con un paño húmedecido en agua tibia.
