## STEP 3 / 4 — Connect the arrangements

Connect the structures made with linear connections or 90° and 120° angles using, depending on the composition, the available links.

### Link

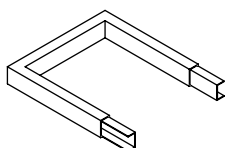

Useful links to create arrangements and anchor some elements.

The Plate link can be used to connect two sofas or to anchor a triangular side table between two or three sofas in a linear (120°) arrangement.

The C link can be used, for example, to support a square side table or cushion placed between two sofas in a linear configuration or to support a 31.5x63 cm rectangular side table in a cantilevered position in relation to a structure, or even to support a ¼ circle side table placed between two sofas in a 90° composition.

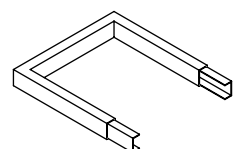

The Island link can be used for special arrangements that require putting two frames one next to the other (S189 or S252) and a final arrangement with four or six pads and four quarter round side tables.

#### Art. 6314 — C-shaped link

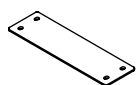

— Dimensions: 31 x 33 x 5 cm

#### Art. 6315 — Island link

— Dimensions: 33,4 x 36 x 5 cm

#### Art. 6316 — Plate link

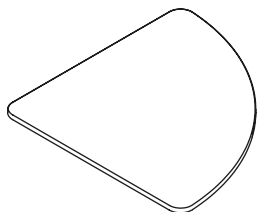

— Dimensions: 26,6 x 8 cm

## Table modules

The  $\frac{1}{4}$  circle and triangular-shaped side tables are suitable for creating specific compositions using the relative links.

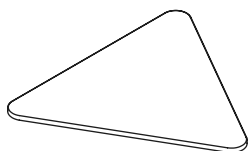

They are available in a laminated finish with a natural oak effect and a laminated finish with a black oak effect.

### Art. 6311 — $\frac{1}{4}$ circle table

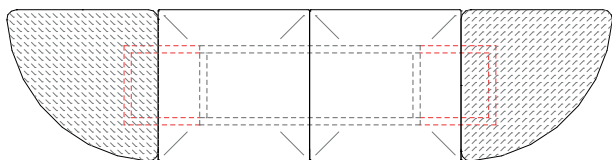

- Dimensions: 63 x 63 cm

### Art. 6312 — Triangular table

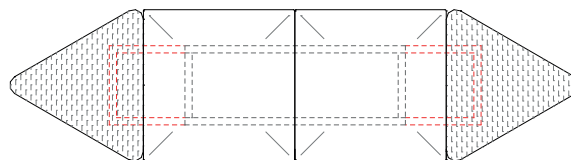

- Dimensions: 63 x 63 x 63 cm
- Thickness: 1,4 cm
- For compositions with 120° angles

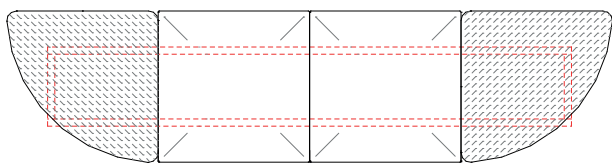

The  $\frac{1}{4}$  circle side table (Art. 6311) and the triangular side table (Art. 6312) cannot be mounted in a cantilevered position or on a structure as an end element, since respectively they would not have sufficient structural stability or the structure itself would not be completely hidden by the top.
