

FlexBoard Pro

SYSTEM  180

Minimalist design. Maximum function.

reddot winner 2021

A working world characterised by team-work and communication is made up of a multitude of collaborative places, information hubs, work surfaces and informal meeting places.

This diverse range of space is used as freely as possible. Everyday work is characterised by a high degree of mobility.

Our new FlexBoard Pro is an advanced, multi-functional tool for agile team and project work that supports mobility.

As a visual display, it is rewritable, pinable and magnetic. A flexible mounting system allows

the use of the lightweight boards both directly on the wall and integrated into our furniture system, i.e. on shelves and room dividers. The FlexBoards Pro can thus be used flexibly, as required, at any location in the office.

With the wall mount the FlexBoard Pro reminds us of floppy disk drives and their way of retrieving stored content. This is because the boards can be stored there with all information until the project work is continued.

The design process was characterized by the requirement to develop a product with a high integration capability, which, thanks to its

simple construction and material properties, is able to positively influence the arrangement of furniture in the room. It has long been clear that future work will be characterised by flexible room division and lower density.

The FlexBoard Pro thus now makes a decisive contribution to the design of new working environments.

FlexBoard Pro

The FlexBoard Pro is available in three different heights, a fixed width of 72 cm and a thickness of 16 mm. Consisting of two sides, the writable and magnetic ceramic surface offers highest writing comfort. The robust and at the same time haptically

pleasant and pinable side consists of an anthracite-coloured fibreboard core made of fleece. The FlexRail allows the integration into the shelf system as well as a wall-mounted solution. The wall storage can be used to store up to four FlexBoard Pro.

FlexBoard Pro S #69304

W/H: 72/72 cm

Light, magnetic white- and pinboard consisting of a fiberboard core made of fleece.

FlexBoard Pro M #69303

W/H: 72/108 cm

Light, magnetic white- and pinboard consisting of a fiberboard core made of fleece.

FlexBoard Pro L #70597

W/H: 72/144 cm

Light, magnetic white- and pinboard consisting of a fiberboard core made of fleece.

FlexRail

Rail profile set for the installation and use of FlexBoard Pro. Available in the widths 360 (# 70769), 450 (#70759), 540 (#70749), 630 (#70739), 720 (#70590), 810 (#70719), 900 (#70729).
· optional in BlackLine

WallRail Pro 2.0 - Grundmodul S/M #78861

WallRail Pro 2.0 - Anbaumodul S/M #78874

Wall mounting for attaching the FlexBoard Pro.

· optional in BlackLine

Wall storage for FlexBoard Pro #70606

W: 72 cm

Wall mounted storage for up to 4 FlexBoard Pro

· optional in BlackLine

FlexBoard Pro S and FlexBoard Pro L horizontal.

FlexBoard Pro Stand

The rollable stand turns the FlexBoard Pro into an innovative whiteboard with height adjustment and double-sided use.

Stand for FlexBoard Pro #73038

W/H/D: 58/129/50 cm

mobile stand, height adjustable on both sides for all sizes of FlexBoard Pro, storage for four FlexBoard Pro

Front: FlexBoard Pro frame with FlexBoard Pro M and L.
Rear: WallRail Pro with FlexBoard Pro L.

Surfaces

You can choose the tubing structure in brushed stainless steel (SteelLine) or steel powder coated in black (BlackLine).

SteelLine
Brushed stainless steel

BlackLine
Steel, powder coated in black

Felt colours

With its felted surface in melange look, the Sonus collection from Camira shows itself to be the ideal textile for use in flexible office landscapes.

With 18 selectable colours, the pinable back of the FlexBoard Pro allows optimal use within a holistic interior design.

The WallRail Pro is mounted on the wall and can be extended as required.

Up to 4 FlexBoards Pro can be stored in the wall storage.

FlexBoard Pro L on one of our room dividers with locker system.

Das FlexBoard Pro wird mit einem Handgriff in das Schienensystem FlexRail eingesetzt.

Die Integration an das Regalsystem, sowie eine wandmontierte Lösung sind durch das FlexRail möglich.
